DETAILED ACTION

Claim Rejections - 35 USC § 112 and § 101

The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

35 U.S.C. 101 reads as follows:

Whoever invents or discovers any new and useful process, machine, manufacture, or composition of matter, or any new and useful improvement thereof, may obtain a patent therefor, subject to the conditions and requirements of this title.

Claims 1-7 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention. Claims 1-7 provides for method of using a compound as a fragrance, and it is unclear what method/process applicant is intending to encompass.

It is also noted that claims 6 and 7 have been interpreted as a process claim, since the term "application" appears to convey such meaning.

Claims 1-7 are rejected under 35 U.S.C. 101 because the claimed recitation of a use, without setting forth any steps involved in the process, results in an improper definition of a process, i.e., results in a claim which is not a proper process claim under 35 U.S.C. 101. See for example *Ex parte Dunki*, 153 USPQ 678 (Bd.App. 1967) and *Clinical Products*, *Ltd.* v. *Brenner*, 255 F. Supp. 131, 149 USPQ 475 (D.D.C. 1966).

Claim 8 is rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant

Page 3

Application/Control Number: 10/572,804

Art Unit: 1796

regards as the invention. Claim 8 states "incorporating a compound of formula la": without mentioning into what substance it is mixed. Therefore this renders the claim indefinite.

Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless -

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claims 8-10 are rejected under 35 U.S.C. 102(b) as being anticipated by Allan et al. (University of Glasgow, UK, Journal of Chemical Society (1959), 2186-92.

Regarding claims 8-10, Allan et al. teach a method of preparing 1-methyl-3-isoprpyl cyclopentyl wherein $R^1 = R^2 = H$, and $R^3 = OH$, as shown in structure below.

With respect to composition's fragrance application, for claims 9, and 10, it has been held that a recitation with respect to the manner in which a claimed article, or composition, is intended to be employed does not differentiate the claimed article from a prior art article satisfying the claimed structural limitation. *Ex parte Masham*, 2 USPQ2d 1647 (1987), IMPEP 2114, R-11.

Application/Control Number: 10/572,804

Art Unit: 1796

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negatived by the manner in which the invention was made.

This application currently names joint inventors. In considering patentability of the claims under 35 U.S.C. 103(a), the examiner presumes that the subject matter of the various claims was commonly owned at the time any inventions covered therein were made absent any evidence to the contrary. Applicant is advised of the obligation under 37 CFR 1.56 to point out the inventor and invention dates of each claim that was not commonly owned at the time a later invention was made in order for the examiner to consider the applicability of 35 U.S.C. 103(c) and potential 35 U.S.C. 102(e), (f) or (g) prior art under 35 U.S.C. 103(a).

Claims 1-7 are rejected under 35 U.S.C. 103(a) as being unpatentable over Allan et al. (University of Glasgow, UK, Journal of Chemical Society (1959), 2186-92.

Regarding claims 1-7, Allan et al. teach a method of preparing 1-methyl-3-isoprpyl cyclopentyl wherein $R^1 = R^2 = H$, and $R^3 = OH$, as shown in structure below.

Application/Control Number: 10/572,804

Art Unit: 1796

Regarding claims 1-7, Allen et al. do not teach its fragrance application.

However, Habib-Emil Eschinazi teach a homolog structure of 1-methyl-3-isoprpyl cyclopentyl having desirable olfactory characteristics and is used as fragrance in soaps; [2: 18-28, 4: 41]. Habib-Emil and Allan are analogous art, that of chemical structure synthesis methyl-isopropyl cyclopentyls. At the time of invention it would have been obvious to a person of ordinary skill in the art to utilize Habib-Emil 's application for Allan's 1-methyl-3-isoprpyl cyclopentyl product with the motivation of making a fragrance.

The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. See PTO form 892.

Correspondence

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Dr. M. Reza Asdjodi whose telephone number is (571)270-3295. The examiner can normally be reached on Monday-Friday 8:00-5:00 EST.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Mark Eashoo can be reached on 571-272-1197. The fax phone number for the organization where this application or proceeding is assigned is 571-273-8300.

Information regarding the status of an application may be obtained from the Patent Application Information Retrieval (PAIR) system. Status information for published applications may be obtained from either Private PAIR or Public PAIR. Application/Control Number: 10/572,804 Page 6

Art Unit: 1796

Status information for unpublished applications is available through Private PAIR only. For more information about the PAIR system, see http://pair-direct.uspto.gov. Should you have questions on access to the Private PAIR system, contact the Electronic Business Center (EBC) at 866-217-9197 (toll-free). If you would like assistance from a USPTO Customer Service Representative or access to the automated information system, call 800-786-9199 (IN USA OR CANADA) or 571-272-1000.

/MARK EASHOO, Ph.D./ Supervisory Patent Examiner, Art Unit 1796 21-Jul-08 /M. R. A./ Examiner, Art Unit 1796 07/15/08
